## PROFILE

Ottmar Edenhofer is Professor at the Technische Universität Berlin and widely considered to be one of the world's leading experts on the economics of climate change. He is Director and Chief Economist at the Potsdam Institute for Climate Impact Research (PIK). From 2007 to 2018 he headed PIK's Research Domain 3 Sustainable Solutions, which received an excellent evaluation by the Leibniz Society in 2014. Following the strategic decision of PIK in 2007 to become more solution-oriented with interdisciplinary Research Domains, Ottmar Edenhofer formed the research agenda of this department. He was pioneering in giving the institute, which traditionally focused on large-scale quantitative computational modelling of the earth and its processes, a social science research agenda providing rigorous and meaningful information on climate change mitigation to society. In 2012 he was appointed director of the newly founded Mercator Research Institute on Global Commons and Climate Change (MCC). The work of the MCC was considered "excellent" by an external scientific evaluation board commissioned by Stiftung Mercator in 2015. It ranked first in Europe and fourth worldwide by the ICCG Climate Think Tank Ranking 2016 and second in the category energy and the environment in Europe within the "Prospect: Think Tank Awards 2016". Edenhofer is member of the German National Academy of Science and Engineering acatech as well as member of the German National Academy of Sciences Leopoldina, Section Economics and Empirical Social Sciences. In July 2018, Edenhofer was awarded the Romano Guardini Prize by the Katholische Akademie in Bayern (Catholic Academy in Bavaria). In 2020, he received the prestigious Deutsche Umweltpreis (German Environmental Award) by the Deutsche Bundesstiftung Umwelt (DBU) amongst others for his outstanding achievements in the field of carbon pricing. In November 2021, Edenhofer was awarded the Arthur Burkhardt-Prize for the interdisciplinary orientation of his research. In December 2022, Edenhofer received the Bavarian Order of the Constitution. In the course of the assembly of academy members on the occasion of Leibniz Day 2023, Edenhofer was appointed to the Berlin-Brandenburg Academy of Sciences and Humanities (BBAW) due to his outstanding scientific achievements.

From 2008 to 2015 Ottmar Edenhofer served as Co-Chair of Working Group III of the Nobel Laureate Intergovernmental Panel on Climate Change (IPCC). In this capacity he led the fifth assessment cycle and edited the report "Climate Change 2014: Mitigation of Climate Change" and the "Special Report on Renewable Energy Sources and Climate Change Mitigation". The Fifth Assessment Report on Climate Change Mitigation is considered a landmark report. It laid the scientific basis for the Paris Agreement. Its analysis on the feasibility of the 2°C-target was ground-breaking and provided essential information for decision makers.

Ottmar Edenhofer's research influences policy-making at national, European and international level. On 24 March 2022, for example, Edenhofer was appointed by the EU to the newly founded European Scientific Advisory Board on Climate Change, which he now chairs. The establishment of this body is prescribed in the European Climate Law. The Advisory Board consists of 15 independent, high-level scientific experts from a broad range of relevant disciplines. It provides independent scientific advice on EU policies and climate targets and their coherence with the European Climate Law and the EU's international commitments under the Paris Agreement and produces reports assessing the extent to which EU policies are consistent with the 2021 European Climate Law and the EU's commitments under the Paris Agreement.

The working visit of Federal Chancellor Merkel and Federal Chancellery Minister Braun to the Potsdam Institute for Climate Impact Research in 2019 once again proved the high relevance and excellence of the policy advice provided by Edenhofer. Edenhofer has succeeded in providing excellent policy advice. His expertise is regularly requested by top decision makers. In Germany these included in the past years, for example, Chancellor Scholz, former Foreign Minister Maas, Minister of Science of Brandenburg Schüle, the party leaderships of the CDU, FDP and the Greens as well as representatives of the Bundesbank. The Federal

Government appointed him, together with the lawyer Sabine Schlacke, Chair of the Climate Protection Science Platform, which has the mandate to monitor the implementation of the climate package and to make respective proposals. On the international stage, Edenhofer is in regular contact with the European Commission, government representatives and institutions such as the European Central Bank and the World Bank. In 2023, for example, Edenhofer met with President of the European Commission von der Leyen and Executive Vice-President for the European Green Deal Šefčovič, as well as the environment ministers of the EU member states as part of the Environment Council. At the national level, Edenhofer had meetings with German President Steinmeier and Federal Minister of Education and Research Stark-Watzinger, among others. At a conference of the German Federal Constitutional Court, Edenhofer spoke to the presidents of the European Constitutional Courts about the economic and ecological foundations of climate protection. He also gave a statement to the German Ethics Council on justice and responsibility in the face of climate change. In December 2020, Ottmar Edenhofer was appointed a consultor of the Vatican's "Dicastery for Promoting Integral Human Development", created by Pope Francis a few years ago. The dicastery's mission is to strengthen justice for refugees and stateless people who have had to leave their homes due to violence, economic crises or natural disasters, as well as promoting justice for the sick and poor.

Edenhofer's expertise is also in high demand in the business world: He has advised f. ex. the world's largest automobile manufacturer Volkswagen, railway company Deutsche Bahn, the German labour union IG Metall as well as insurance companies and banks to develop concepts for climate protection and sustainability.

Furthermore, he is a member of the "High-Level Commission on Carbon Prices" chaired by Joseph Stiglitz, Nobel Laureate in Economics, and Lord Nicholas Stern at the invitation of Sérgolène Royal and Feike Sijbesma, Co-Chairs of the Carbon Pricing Leadership Coalition (CPLC) High Level Assembly. The commission prepared a highly regarded scientific assessment on carbon pricing for the World Bank Group and International Monetary Fund Spring Meetings in 2017. In connection with the German G20 presidency in 2017, Edenhofer headed the T20 Task Force "Climate Policy and Finance" which prepared scientific policy advice for the G20 and was a member of the OECD Advisory Council "Growth, Investment and the Low-Carbon Transition". From 2015 until February 2024 he was part of the "National Expert Advisory Council on Climate Change" for Ireland which was set up in 2015 in the framework of the "Climate Action and Low-Carbon Development Bill 2015". The Council advises and makes recommendations to the Minister for the Environment, community and local government as a national mitigation plan is prepared. Ottmar Edenhofer was appointed Coordinating Lead Author of the chapter on Economic Growth, Human Development and Planetary Welfare for the report "Rethinking Society for the 21st Century" by the International Panel on Social Progress (IPSP). The Panel includes renowned economists and works under the patronage of Amartya Sen.

The FAZ ranked Edenhofer in 2019 and 2020 among the 10 most influential economists in Germany, in 2021 he was ranked on place 15. In 2018, 2020, 2021 and 2022, Ottmar Edenhofer belonged to the 1% of the most cited scientists worldwide in the category "interdisciplinary science" according to the Web of Science citation index. He has published articles in Science, PNAS, Nature, Nature Climate Change, European Economic Review, Resource and Energy Economics, Energy Economics, Macroeconomic Dynamics, World Development, Journal of Environmental Economics and Management as well as other peer-reviewed journals and authored a number of books. His publications address the design of instruments for climate and energy policy, questions of growth, technological change and development, public finance, welfare economics, distributional effects of climate policy instruments, game theoretic aspects of designing international agreements, long-term scenarios of the climate and energy system, mitigation costs and mitigation strategies, as well as the science-policy interface. His work has been heavily cited, which is

illustrated by an h-index of 52 in Scopus, 49 in Web of Science and 77 in Google Scholar. Edenhofer's work has been picked up e.g. by The New York Times, the Economist, China Daily Nature, Der Spiegel, ARD, ZDF and Deutschlandfunk. He frequently contributes to major media publications such as DIE ZEIT, Süddeutsche Zeitung and Frankfurter Allgemeine Zeitung.

Edenhofer supervised 62 successfully completed PhD projects and currently supervises 19 PhD students. His former PhD students received prestigious prizes for their dissertations and some of them have been appointed to professorships in the meantime.
